

*Achieve Your Quality and Efficiency Goals and Satisfy Your Analytic Needs with a Single Solution*

MedVention provides an integrated performance management solution. Clients leverage our best-in-class business and clinical intelligence platform to create the solution they need today, knowing that they can grow with us as their needs evolve. We go beyond ordinary data management and analytics - we provide a suite of sophisticated intervention tools that drive real improvements in cost and quality.

Our robust reporting platform is augmented with multiple, interoperable modules that support initiatives for improving the quality of care and reducing costs. In one place you can analyze your data and work with tools that drive real improvements across the entire spectrum of cost and quality metrics.

*How are other health plans, like you, using MedVention technology to create a solution that is right for them?*

- Designing, implementing and managing innovative Pay for Performance programs tailored to their organization’s specific needs - with tools that automate calculating P4P payments and provide full transparent reporting.
- Reducing gaps in care and improving compliance with quality measures and care guidelines, including HEDIS - with registries and automated customizable member and physician outreach communications tools
- Efficiently tracking and reporting compliance and improvements in evidence-based care guidelines, while reducing the administrative burden associated with this work
- Improving utilization and quality metrics with robust, sophisticated physician profiling, including risk-adjusted efficiency profiles at the physician and group levels for both PCPs and specialists. These provide an accurate evaluation of performance and include deep drill-down capabilities to understand the underlying drivers and opportunities for improvement
- Controlling escalating pharmacy costs with intervention programs to drive formulary compliance, increase generic prescribing, and reduce pharmacy costs - that supplement their PBM’s capabilities
- Reducing IT work queues and improving internal turn-around times with direct on-line access to flexible, intuitive, easy to use reporting and intervention tools
