

Achieve Your Quality, Efficiency, and Performance Goals with a Single Solution

MedVention offers a fully-integrated suite of business intelligence and physician / patient outreach applications. Our comprehensive product suite includes interactive registries, pharmacy and quality outreach modules, and a dynamic, drill-down reporting tool. MedVention’s capabilities provide a significant opportunity for quality and financial performance improvements. We pride ourselves in being a physician-founded organization that produces physician-friendly solutions to accomplish measurable improvement in the real world of medical care.

How can you use MedVention solutions?

MedVention provides everything you need from risk adjusted profiling to automated P4P adjudication, quality intervention communications, and web-based point of care decision support tools:

- Aggregate all your data including claims, prescription claims, lab data, EMR data, and more
- Calculate and track P4P, EBM, state-specific, payer-specific, and customized clinical measures
- Deliver patient-specific recommendations through population-based campaigns and at the point-of-care

MedVention is not a software company trying to sell to healthcare; we are a healthcare company leveraging technology to solve real-world clinical and financial challenges.

Key features:

- Interactive Dashboards allow instant access to up-to-date metrics for membership, quality, P4P performance and more.
- Menu-driven reports with dynamic multilevel drill-down provide sophisticated risk adjusted reports and profiles. Cognos® cubes and data warehouse access give you the ultimate in custom reporting for all your needs including quality, utilization, and financial performance.
- Automated Web-based tools identify patients out of compliance with care guidelines. Implement efficient population management, sending patient-specific quality improvement and prescribing recommendations to patients and/or their physicians in multiple languages.
- Exception reporting improves tracking of ineligible patients, thereby reflecting true performance and maximizing revenue.
- Interactive registries with integrated work queues support guideline compliance and e-prescribing at the point-of-care.
- MedVention’s P4P Adjudicator allows you to audit plan P4P payments and distribute payments across your organization according to criteria you set.
